Proposal Title

Your Name

The proposal is not expected to be more than one page (without the figure), but you can use two pages if necessary. Following are some guidelines on what needs to be addressed in the proposal:

1. Describe the scope of the intended project.

2. What are objectives and goals?

3. What analytical work and implementation is required?

4. What tests would you use to verify your implementation?

5. What steps do you need to take from your current state to the completion of the project?

6. What are your knowledge gaps and how you intend to fill them?

7. If your team is more than one person, include a collaboration plan that describes each members expected contribution.

8. What are the milestones in your project? Include a rough timeline.

Figure 1: If needed, you can use some schematic for describing your work.
